Profile

Full Stack Developer with experience in building scalable solutions and optimizing backend systems. Specialized in distributed architectures, automation, and agile development with .NET 8, Node.js, and SQL/NoSQL databases. Focused on code quality, CI/CD, and collaborative work in Scrum environments.

Work Experience

Cal Engineering Solutions, S.A.

Software Engineer | October 2024 – Present

- Developed services in .NET 8 and Node.js, building RESTful APIs that integrate multiple systems.
- Automated unit and integration testing with Jest and xUnit.
- Optimized PostgreSQL and MongoDB databases, improving query efficiency by 30%.
- Implemented real-time features using Socket.io, enhancing user interactivity, and applied design principles (SOLID, Mediator) to ensure scalable and maintainable code.

Tenkai Tech Panamá

Full Stack Developer | March 2024 – September 2024

- Developed the backend using Node.js, creating efficient and scalable RESTful APIs.
- Built the frontend with React, designing dynamic and responsive interfaces.
- Integrated real-time functionality using Socket.io to improve user interaction.
- Optimized PostgreSQL databases to ensure optimal performance.
- Utilized Docker to containerize the application and streamline deployment in production environments.

Education

Universidad Metropolitana de Educación, Ciencias y Tecnología.

- Bachelor's Degree in Systems and Programming | 2021 – Ongoing

Languages

- Spanish- Native
- English – Intermediate B2

Technical Skills

Languages: JavaScript/TypeScript (Node.js, NestJS, Express.js) – Intermediate | C# (.NET 8) – Intermediate | Python (AI, Automation) – Intermediate | Java – Basic.

Frontend: React, Vue – Intermediate | PrimeVue, Tailwind CSS, HTML5/CSS3 – Intermediate.

Backend & Architecture: .NET 8, Node.js – Advanced | WebSockets (Socket.io), Feature Flags – Intermediate.

Databases: PostgreSQL, SQL Server – Advanced | MongoDB – Intermediate (Optimization, migrations).

Testing & Quality: Jest, xUnit – Intermediate | SOLID, Mediator – Strong knowledge.

DevOps & Deployment: CI/CD (Azure DevOps, GitHub Actions) | Docker, AWS, Azure – Intermediate.

Tools & Methodologies: Git, GitHub, Jira | Scrum – Daily use.
